- 1 Several cross country runners were running one morning. Carlos had a 20 meter head start, Angela had a 30 meter head start, and Juan had a 35 meter head start. Susan had no head start. The tables below show each person's distance at a specific time in the race. Which table shows a proportional relationship?

A Carlos

Time (sec)	Distance (m)
0	20
2	24
4	28
6	32
8	36
10	40

B Angela

Time (sec)	Distance (m)
0	30
2	32
4	34
6	36
8	38
10	40

C Susan

Time (sec)	Distance (m)
0	0
2	8
4	16
6	24
8	32
10	40

D Juan

Time (sec)	Distance (m)
0	35
2	36
4	37
6	38
8	39
10	40

- 2 Jeff delivers newspapers for his summer job. The chart shows Jeff's wages based on the hours he works.

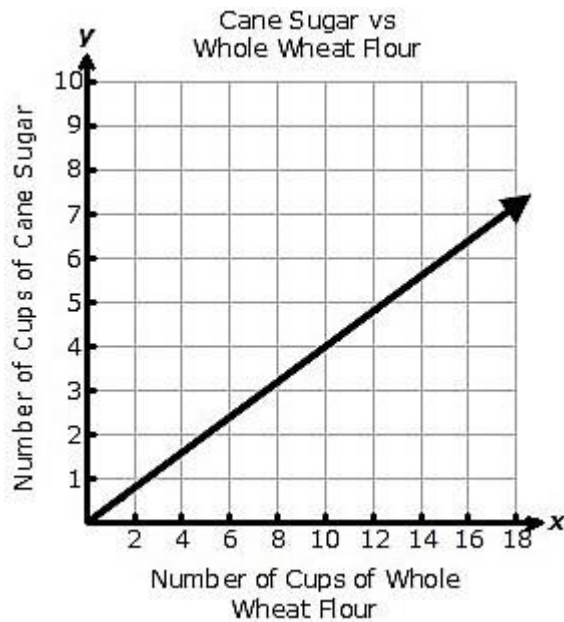

Jeff's Wages Chart

Hours Worked (h)	Amount Paid (P)
2	\$18
5	\$45
8	\$72
12	\$108

Based on the information in the chart, which equation represents the relationship between h , the number of hours Jeff worked, and P , the total amount he was paid?

- F** $P = 18h$
G $P = h + 9$
H $P = 9h$
J $P = 18 \div h$

- 3 The graph shows the relationship between the number of cups of cane sugar and the number of cups of whole wheat flour used in a dessert recipe.

Which equation represents this relationship?

- A** $y = \frac{1}{2}x$
- B** $y = \frac{5}{2}x$
- C** $y = \frac{8}{3}x$
- D** $y = \frac{2}{5}x$
- 4 A case of bottled water contains 24 bottles. Each case contains a total of 405.6 ounces of water.

Which equation represents the relationship between ounces of water, y , and number of bottles, x ?

- F** $y = 16.9x + 24$
- G** $y = 0.059x$
- H** $y = 24x + 405.6$
- J** $y = 16.9x$

- 5 The approximate distance in inches, i , for a length of m meters is equivalent to 39.37 times the value of m . Which table represents this relationship?

A

Length

Meters, m	Inches, i
39.37	0
78.74	1
118.11	2
157.48	3

B

Length

Meters, m	Inches, i
1	39.37
2	78.74
3	118.11
4	157.48

C

Length

Meters, m	Inches, i
39.37	1
78.74	2
118.11	3
157.48	4

D

Length

Meters, m	Inches, i
0	39.37
1	78.74
2	118.11
3	157.48

- 6 At the grocery store, dried beans are on special for \$0.45 for 3 ounces. Which of these graphs best represents the relationship between the number of ounces of dried beans and the cost?

F

G

H

J

- 7 Sherman bought a new house 5 months ago. He has paid \$350 over 5 months to his neighborhood homeowners association for his monthly association fees.

Which representation shows the relationship between the fees Sherman has paid to the homeowners association, y , and the number of months, x ?

A Homeowners Fees

Number of months, x	Total Fees, y
7	\$510
8	\$580
9	\$650
10	\$720

B Homeowners Fees

Number of months, x	Total Fees, y
5	\$350
6	\$700
7	\$1,050
8	\$1,400

C

D

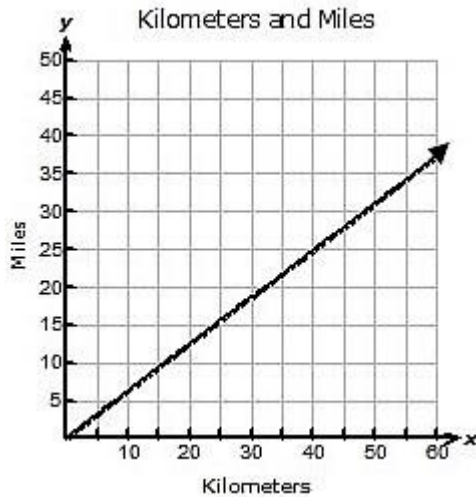

- 8 There are 50 kilometers in 31 miles. Which representation does NOT show the same relationship?

F

x	y
20	1
28	11
50	31
63	44

G

H 186 miles is the same distance as 300 kilometers.

J $y = 0.62x$

- 9 A can of juice contains 175 calories per 2.5 servings. Which of the following is **NOT** an equivalent number of calories per serving?
- A 280 calories per 4 servings
 - B 910 calories per 13 servings
 - C 525 calories per 8 servings
 - D 630 calories per 9 servings
